PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience designing and building RESTful microservices using Java 8/17 and Spring Boot. Skilled in implementing secure authentication and role-based authorization with Spring Security and JWT, designing relational schemas with JPA/Hibernate and MySQL, and applying layered (Controller-Service-Repository) architecture for maintainable code. Experienced in writing unit and integration tests (JUnit, Mockito, MockMvc), using Git for version control, and debugging application issues end-to-end. Strong foundation in OOP, SDLC, and clean coding practices, with a fast learning curve and readiness to contribute to enterprise backend systems.

TECHNICAL SKILLS

- Programming Languages: Java 8, Java 17
- Backend Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC
- Security: Spring Security, JWT Authentication, Role-Based Access Control
- APIs & Architecture: REST APIs, Layered/MVC Architecture, CRUD design
- Databases: SQL Database(MySql), relational data modeling
- Testing: Unit Testing, Integration Testing and Basic understanding of testing principles
- Frontend: HTML, CSS, JavaScript, React
- Tools & Practices: Git, GitHub, Maven, Postman, VS Code, Eclipse, SDLC, Debugging, Exception Handling

PROJECTS

FloraMart — Full Stack Marketplace Platform

2026

Environment: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, REST APIs, React

- Designed and developed a full-stack marketplace platform enabling buyers and sellers to manage flower listings, quotations, and orders through dedicated role-based modules.
- Implemented secure authentication and authorization using Spring Security and JWT, enforcing buyer/seller access control across REST endpoints.
- Built RESTful APIs for product listing, quotation management, and order processing following a layered Controller-Service-Repository architecture.
- Designed the relational database schema in MySQL using JPA/Hibernate to persist users, products, quotations, and orders.
- Applied input validation and centralized exception handling to maintain data integrity and deliver consistent API responses.

Java Bank Management System

2025

Environment: Java (OOP), JDBC, SQL

- Developed a modular banking application supporting account creation, deposits, withdrawals, fund transfers, and balance enquiry.
- Implemented transaction history tracking and exception handling to ensure accurate, reliable financial record-keeping.
- Applied OOP principles and JDBC-based SQL integration for persistent, database-backed backend logic.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — EcLearnix EdTech Pvt. Ltd., Coimbatore

Feb 2026 – Mar 2026

- Developed and maintained front-end features while integrating SQL-backed data into web application workflows.
- Performed REST API testing using Postman and debugged issues to support stable feature delivery and website maintenance.

Web Development Intern — Falcon Software Solutions Pvt. Ltd., Coimbatore

Jul 2024 – Aug 2024

- Built responsive web pages using HTML, CSS, and JavaScript, and implemented UI improvements based on requirements.
- Collaborated with the development team on feature delivery in a fast-paced, agile environment.

EDUCATION

B.E. Computer Science & Engineering (IoT & Cyber Security incl. Blockchain) — SNS College of Engineering

2022- 2026

- CGPA: 7.82 / 10

CERTIFICATIONS

- Java — Infosys Springboard
- SQL — Preplnsta
- Azure AI Fundamentals — Microsoft
- Cyber Security — NPTEL
- Distributed Cloud Computing — NPTEL
